Texans for Medical Marijuana was a statewide grassroots organization that began in January of 2004 with a mission of changing Texas law to protect medical marijuana patients from arrest and incarceration. The organization ceased operations in May 2007.

For current information and ways to be involved in the Texas Medical Marijuana movement. Join Texas Coalition for Compassionate Care is working towards securing safe access of medical marijuana for those Texans who need it most. As our name states, we seek to build a broad base coalition across our state of local chapters, churches and synagogues, medical organizations, and other supporting organizations to join with us in this work.
